I have been working with cameras for 5+ years, on a variety of productions around the world, working run and gun solo and in larger crews. Filming in often challenging and demanding situations with cinema, documentary, broadcast, action cameras and drones. My focus is ultimately working my way up to DP within the camera department and aiding in the success of any production, anyway I can. I'm very comfortable and adaptable living out of a suitcase, as I am working out of a Peli case.
